

Automatic Calculation of Bonus Points for League Games

This functionality in Play-Cricket allows league administrators to define the rules for the calculation of bonus points so that the points to be awarded in each game can be automatically calculated.

It is possible to create different schedules to be applied to different divisions. If a schedule to calculate bonus points automatically has been applied to a division, club administrators will not be able to change the points although a league administrator may adjust the points where required.

Set Up Bonus Point Schedule(s)

Select Bonus Points in the Admin>Set Up>Competitions section.

Click the 'Add' button to create a new schedule.

Give the schedule a name and click the 'Next' button. For ease of identification, the name of the schedule could include the divisions to which it applies, or it could describe the result type. The schedules that you create will appear in alphabetical order.

The first page of the schedule – Application Rules - is where you select the result types to which the bonus points are applied by ticking the boxes. Enter the maximum bonus points to be awarded for batting and bowling. This number can be any positive number including decimals and sets the limit for the number of bonus points that can be awarded.

When you click the 'Save' button, you will see the message 'Record saved' at the top of the screen.
You can now choose from the following tabs to complete the schedule:

Batting Runs Scored

Points are awarded based on the number of runs scored being greater than or equal to the number specified.

Click the 'Add' button to define points to be awarded in this section. Select the fields that apply and then save the entry. Continue to add entries as required.

In the example above, the 'Scheduled Overs' field has been left blank.

When completed, the Batting Runs Scored schedule would look like this:

Bonus Points - Division 1 Apply to Existing Results Back

Application Rules

- Batting Runs Scored
- Batting % Target
- Batting Run Rate
- Batting Wickets Left
- Bowling Wickets Taken
- Bowling All Out Score
- Pairs Net Score
- Divisions

Points are awarded based on the number of runs scored. You can differentiate based on who won the toss, batting first or second, and the number of scheduled overs.

Add

Runs Scored	Won Toss	Batted	Scheduled Overs	Points	Edit	Remove
150		1st		1		
175		1st		2		
200		1st		3		

Select the 'Edit' icon to make any changes. Here is an example of a set up where the points are awarded depending on the number of scheduled overs:

Overs Bonus Points Apply to Existing Results Back

Points are awarded based on the number of runs scored. You can differentiate based on who won the toss, batting first or second, and the number of scheduled overs.

Add

Runs Scored	Won Toss	Batted	Scheduled Overs	Points	Edit	Remove
125			50	1		
150			50	2		
175			50	3		
200			50	4		
225			50	5		
123			49	1		
147			49	2		
172			49	3		
196			49	4		
221			49	5		

Batting % Target

Use this tab to set up points for the side batting second obtaining a percentage of the runs scored by the side batting first.

Bonus Points - Division 1 Apply to Existing Results Back

Application Rules
Batting Runs Scored
Batting % Target
Batting Run Rate
Batting Wickets Left
Bowling Wickets Taken

Points are awarded based on the team batting second obtaining a percentage of the runs scored by the team batting first or a revised target.

Add

Percentage	Won Toss	Points	Edit	Remove
------------	----------	--------	------	--------

The 'Add' button will take you to this screen below. Select the required fields and save the changes.

The system will check that the divisions selected do not already have a schedule attached which includes the same result type specified in the Application Rules.

Copy Schedule

When adding a new schedule that is similar to an existing one, you can use the 'Copy' function to save time.

Click the 'Copy' button and select the schedule to be copied from the dropdown list.

Now give the schedule a name and click the 'Next' button to continue as before, changing the fields to use different values as required.

Apply to Existing Results

If results have been entered and you realise that the schedule has not been set up correctly, amend the schedule and click 'Apply to Existing Results' to update the bonus points that have already been awarded.

Division Management

When a schedule has been applied to a division using the Bonus Points section, you will be able to see the schedule in the Results Set Up section of the division.

The screenshot shows the 'Division 1 - 2017 - Division Management' interface. The 'Bonus Points' tab is selected and circled in red. The interface includes a navigation menu with options like 'Division Set Up', 'Results Set Up', 'Aggregate Results', 'League Table Set Up', 'Reports', 'Team Management', 'Fixture Management', and 'Division Table'. Below the navigation menu, there are tabs for 'Wins', 'Draws', 'Tied Games', 'Non Results', 'Conceded Games', and 'Bonus Points'. The 'Bonus Points' section contains two main areas: 'How do you wish to display bonus points in league tables and results' with three radio button options, and 'Select any bonus point schedules that you wish this division to use to calculate bonus points. The selection order does not matter' with a list of five dropdown menus. The first dropdown menu is selected and shows 'Division 1'. At the bottom of the section are 'Save' and 'Cancel' buttons.

The schedule will be carried forward when a new season is generated and when a new division is created from an existing one.

If you create a new division from scratch, you may also select an existing bonus schedule from the dropdown list.

Adjustments to bonus points

Where bonus points are shown on a scorecard, they may be adjusted to cater for unusual circumstances.

Enter the reason for the adjustment in the box provided.
