Match Summary API

This API will return both fixtures yet to be played and matches with results. It is primarily used at the start of the season to obtain a list of fixtures and then run at regular intervals using the from_entry_date parameter to identify records added, amended or deleted since the call was last run

GET http://play-cricket.com/api/v2/matches.json?&site_id=1234&season=2018&api_token=xxxx

Parameters

api_token :	string	required
site_id:	Int	required
division_id :	Int	
cup_id :	Int	
team_id:	Int	
season:	string	
competition_type:	string (League, Cup or Friendly)	
from_entry_date:	string (dd/mm/yyyy)	
end_entry_date:	string (dd/mm/yyyy)	
include_unpublished	string (yes)	

Note unpublished matches are fixtures that have been created in league sites but not yet been published in the front end or made available in the club sites. The majority of users will not require these records

Play Cricket will respond with a list of matches meeting the criteria.

```
